TINKA RESOURCES LIMITED
NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS
FOR THE THREE MONTHS ENDED DECEMBER 31, 2024
(Unaudited - Expressed in Canadian Dollars)

1. Nature of Operations and Going Concern

Tinka Resources Limited (the “Company”) was incorporated on September 15, 1987 under the provisions of the Company Act (British Columbia). The Company is listed and traded on the TSX Venture Exchange (“TSXV”) and the Lima Stock Exchange under the symbol “TK”, on the OTCQB under the symbol “TKRFF” and on the Frankfurt Exchange under the symbol “TLD”. The Company’s principal office is located at #1305 - 1090 West Georgia Street, Vancouver, British Columbia, V6E 3V7 Canada.

The Company is a junior mineral exploration company currently engaged in the acquisition and exploration of mineral properties located in Peru. On the basis of information to date, the Company has not yet determined whether these properties contain economically recoverable ore reserves. The underlying value of the mineral resource interests is entirely dependent on the existence of economically recoverable reserves, the ability of the Company to obtain the necessary financing to complete exploration and development and upon future profitable production. Mineral resource interests represent costs incurred to date, less amounts amortized and/or written off, and do not necessarily represent present or future values.

The Company’s mineral properties are located in Peru and consequently the Company is subject to certain risks, including currency fluctuations and possible political or economic instability which may result in the impairment or loss of mining title or other mineral rights, and mineral exploration and mining activities may be affected in varying degrees by political stability and governmental regulations relating to the mining industry.

As at December 31, 2024 the Company had working capital in the amount of \$2,806,934. These condensed consolidated interim financial statements have been prepared on a going concern basis which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business operations for the foreseeable future. To date the Company has not earned any revenue and is considered to be in the exploration stage. The Company’s operations are funded from equity financings which are dependent upon many external factors and may be difficult to impossible to secure or raise when required. Management considers that the Company will need to raise additional capital from the sale of common shares or other equity or debt instruments to maintain its core operations and planned exploration programs on its existing exploration and evaluation assets for the next twelve months. The Company also recognizes that exploration expenditures may change with ongoing results and, as a result, it may be required to obtain additional financing. While the Company has been successful in securing financings in the past there can be no assurance that it will be able to do so in the future. If the Company is unable to raise the necessary capital and generate sufficient cash flows to meet obligations as they come due, the Company may have to reduce or curtail its operations or obtain financing at unfavourable terms. The material uncertainty may cast significant doubt about the Company’s ability to continue as a going concern. Furthermore, failure to continue as a going concern would require the Company’s assets and liabilities to be restated on a liquidation basis which would differ significantly from the going concern basis. These condensed consolidated interim financial statements do not include any adjustments to the amounts and classification of assets and liabilities that may be necessary should the Company be unable to continue as a going concern.

2. Basis of Preparation

Statement of Compliance

These condensed consolidated interim financial statements have been presented in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board (“IASB”), applicable to the preparation of condensed consolidated interim financial statements, including IAS 34, *Interim Financial Reporting*.

The preparation of condensed consolidated interim financial statements requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from these estimates.

Basis of Measurement

The Company’s condensed consolidated interim financial statements have been prepared on the historical cost basis except for the revaluation of certain financial assets and financial liabilities to fair value. These condensed consolidated interim financial statements are presented in Canadian Dollars unless otherwise stated.

3. Material Accounting Policies

These condensed consolidated interim financial statements have been prepared on a basis consistent with the material accounting policies disclosed in the consolidated financial statements for the year ended September 30, 2024. Accordingly, they should be read in conjunction with the consolidated financial statements for the year ended September 30, 2024.

Accounting Standards and Interpretations Issued but Not Yet Effective

IFRS 18, *Presentation and Disclosure in Financial Statements*, which will replace IAS 1, *Presentation of Financial Statements* aims to improve how companies communicate in their financial statements, with a focus on information about financial performance in the statement of profit or loss, in particular additional defined subtotals, disclosures about management-defined performance measures and new principles for aggregation and disaggregation of information. IFRS 18 is accompanied by limited amendments to the requirements in IAS 7 *Statement of Cash Flows*. IFRS 18 is effective from January 1, 2027. Companies are permitted to apply IFRS 18 before that date.

The Company has performed an assessment of new standards issued by the IASB that are not yet effective and has determined that any other standards that have been issued would have no or very minimal impact on the Company's condensed consolidated interim financial statements.

9. Financial Instruments and Risk Management

Categories of Financial Assets and Financial Liabilities

Financial instruments are classified into one of the following categories: fair value through profit or loss (“FVTPL”); amortized cost; and fair value through other comprehensive income (“FVOCI”). The carrying values of the Company’s financial instruments are classified into the following categories:

Financial Instrument	Category	December 31, 2024 \$	September 30, 2024 \$
Cash	FVTPL	3,063,624	2,076,217
Accounts payable and accrued liabilities	Amortized cost	(338,572)	(437,687)

The Company’s financial instruments recorded at fair value require disclosure about how the fair value was determined based on significant levels of inputs described in the following hierarchy:

Level 1 - Quoted prices are available in active markets for identical assets or liabilities as of the reporting date. Active markets are those in which transactions occur in sufficient frequency and value to provide pricing information on an ongoing basis.

Level 2 - Pricing inputs are other than quoted prices in active markets included in Level 1. Prices in Level 2 are either directly or indirectly observable as of the reporting date. Level 2 valuations are based on inputs including quoted forward prices for commodities, time value and volatility factors, which can be substantially observed or corroborated in the market place.

Level 3 - Valuations in this level are those with inputs for the asset or liability that are not based on observable market data.

The recorded amounts for accounts payable and accrued liabilities approximate their fair value due to their short-term nature. The Company’s cash under the fair value hierarchy are measured using Level 1 inputs.

The Company’s risk exposures and the impact on the Company’s financial instruments are summarized below:

Credit Risk

Credit risk is the risk of loss associated with a counterparty’s inability to fulfill its payment obligations. The Company’s credit risk is primarily attributable to cash. Management believes that the credit risk concentration with respect to financial instruments included in cash is remote.

Liquidity Risk

Liquidity risk is the risk that the Company will not have the resources to meet its obligations as they fall due. The Company manages this risk by closely monitoring cash forecasts and managing resources to ensure that it will have sufficient liquidity to meet its obligations. All of the Company's financial liabilities are classified as current and are anticipated to mature within the next fiscal period. The following table is based on the contractual maturity dates of financial assets and the earliest date on which the Company can be required to settle financial liabilities.

Contractual Maturity Analysis at December 31, 2024					
	Less than 3 Months \$	3 - 12 Months \$	1 - 5 Years \$	Over 5 Years \$	Total \$
Cash	3,063,624	-	-	-	3,063,624
Accounts payable and accrued liabilities	(338,572)	-	-	-	(338,572)
Contractual Maturity Analysis at September 30, 2024					
	Less than 3 Months \$	3 - 12 Months \$	1 - 5 Years \$	Over 5 Years \$	Total \$
Cash	2,076,217	-	-	-	2,076,217
Accounts payable and accrued liabilities	(437,687)	-	-	-	(437,687)

Market Risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices. These fluctuations may be significant.

(a) Interest Rate Risk

The Company is exposed to interest rate risk to the extent that the cash bear floating rates of interest. The interest rate risk on cash and cash equivalents and on the Company's obligations are not considered significant.

(b) Foreign Currency Risk

The Company has operations in Canada and Peru which are subject to foreign currency fluctuations. The Company's operating expenses are incurred in Canadian Dollars and Peruvian Nuevo Soles and the fluctuation of the Canadian Dollar in relation to other currencies will have an impact upon the profitability of the Company and may also affect the value of the Company's assets and the amount of shareholders' equity. The Company also maintains a US Dollar bank account with a Canadian bank. The Company has not entered into any agreements or purchased any instruments to hedge possible currency risks. At December 31, 2024, 1 Canadian Dollar was equal to 2.61 Peruvian Nuevo Soles and 0.69 US Dollar.

Balances are as follows:

	Peruvian Nuevo Soles	US Dollars	CDN \$ Equivalent
Cash and cash equivalents	118,108	1,946,485	2,866,245
Accounts payable and accrued liabilities	(483,834)	-	(185,377)
	<u>(365,726)</u>	<u>1,946,485</u>	<u>2,680,868</u>

Based on the net exposures as of December 31, 2024 and, assuming that all other variables remain constant, a 10% fluctuation on the Canadian Dollar against the Peruvian Nuevo Soles and US Dollar would result in the Company's net loss being approximately \$246,000 higher or lower.

Capital Management

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support the acquisition and exploration of mineral properties. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business. The Company defines capital that it manages as share capital and cash. The Company will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do so. Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.
